

Flipkart Sales Dashboard Analysis Report

1. Project Overview

This project involved the creation of an interactive sales dashboard using Microsoft Excel to analyze a simulated Flipkart sales dataset. The primary objective was to transform raw transactional data into meaningful business insights regarding profitability, regional performance, and customer behavior.

2. Core Objectives

- KPI Tracking: Calculate and monitor Total Sales, Profit, Order volume, and Customer count.
- Geographic Analysis: Evaluate performance across different Indian states and regions.
- Product & Category Insights: Identify top-performing categories and products by sales and quantity.
- Payment Trends: Understand the distribution of various payment methods used by customers.
- Temporal Growth: Track monthly trends to identify growth or decline in sales and profit.

3. Data Methodology

- Data Cleaning: Removed empty rows and standardized data formats for consistency.
- Calculations & Modeling: Utilized Pivot Tables to aggregate data and created Key Performance Indicators (KPIs).
- Visualization: Developed various charts, including Combo, Pie, Waterfall, and Map charts, to present data visually.
- Interactivity: Integrated slicers for Date, Region, Category, and Payment Mode to allow for dynamic data exploration.

4. Key Findings & Performance Metrics

A. Executive Summary (Overall KPIs)

- Total Sales: ₹2,307,500
- Total Profit: ₹316,200
- Total Quantity Sold: 160 units
- Total Customers: 100
- Average Order Value: ₹23,075

B. Regional & State Performance

- Leading Region: North – ₹978,000 Sales | ₹131,500 Profit
- South – ₹746,000 Sales | ₹100,500 Profit
- East – ₹309,000 Sales | ₹38,600 Profit
- West – ₹274,500 Sales | ₹45,600 Profit

C. Category & Product Analysis

- Electronics – ₹1,502,500 Sales | 76 Units Sold
- Home Appliances – ₹709,000 Sales
- Top Products by Profit:
- Laptop – ₹72,000
- TV – ₹49,500
- Mobile – ₹42,000

D. Customer Payment Behavior

- UPI – 29 Customers (Most Preferred)
- COD – 22 Customers
- Credit Card – 21 Customers
- Debit Card – 11 Customers (Least Used)

E. Monthly Trends

- Peak Month: April – ₹720,500 Sales | ₹108,000 Profit
- Lowest Performance: March – ₹96,000 Sales | 48 Units Sold (Lower-value transactions)

5. Dashboard Features

- KPI Cards for instant visibility of total sales, profit, and quantity.
- State-wise Sales Map for geographic distribution.
- Payment Mode Share visualization to track customer checkout preferences.
- Monthly Sales & Profit Trend chart for time-series analysis.
